 - **Hypothyroidism: Clinical diagnosis, significance of Basal Body Temperature in clinical practice**
 - **Endocrinology Update: Review of Recent Research**
- See following pages for schedule and registration information •

The Broda O. Barnes, M.D. Research Foundation, Inc. is pleased to present an exciting program for our Fall 2007 Endocrinology Conference.

We will bring back some popular speakers who will address subjects related to endocrine hormones from many perspectives, including the inter-relationships of hormones, effects of nutrition on hormone function, the communication system between neurotransmitters and hormones, and hormonal effects of certain drug therapies.

You will learn new strategies you can use in your clinical practice to confidently manage endocrine problems such as thyroid, adrenal and gonadal deficiencies.

We will also offer a review of recent research, including an exciting study on the use of corticosteroids in cardiac surgery.

Our extensive presentations and ample Q & A time will make this the one seminar you don't want to miss this year. We look forward to seeing you there!

Who should attend

- Physicians in clinical practice
- Academic and research physicians
- Allied health professionals
- Staff members and spouses welcome
